Notes:

1. All data in this report are based upon information provided to the New Hampshire Department of Health and Human Services under specific legislative authority. The numbers reported may represent an underestimate of the true absolute number and incidence rate of cases in the state. Any release of personal identifying information is conditioned upon such information remaining confidential. The unauthorized disclosure of any confidential medical or scientific data is a misdemeanor under New Hampshire law. The department is not responsible for any duplication or misrepresentation of surveillance data released in accordance with this guideline. All data in this report are complete as of March 31, 2007.
2. Cumulative HIV cases include all NH residents diagnosed with HIV infection (not AIDS) from January 1, 1983 through March 31, 2007.
3. Persons living with HIV include all NH residents diagnosed with HIV presumed to be alive.
4. Cumulative AIDS cases include all NH residents diagnosed with AIDS from January 1, 1983 through March 31, 2007.
5. Persons living with AIDS include all NH residents diagnosed with AIDS presumed to be alive.
6. Percentages may not add up to 100 due to rounding.
7. Pediatric case is defined as < 13 years of age at the time of diagnosis.
8. NH case count totals may fluctuate due to data quality procedures.
9. County is based upon residence at time of disease diagnosis and includes no additional information regarding exposure.
